DETAILED ACTION

1. Claims 3-5, 7-11 and 14-18 in condition for allowance.
2. The following is an examiner's statement of reasons for allowance: The prior art(s) of record does not disclose alone or in combination the following:

Regarding Claims 3, 4, 5 and 11, the motor controller decreases the motor phase current to the reference current using the fast current decay and switches to the slow current decay following a defined time period where the defined time period is equal to twice an elapsed time required to reduce the motor phase current to the reference current.

Regarding Claim 14, the prior art(s) of record does not disclose when the reference current equals zero, reducing the motor phase current using the fast current decay process, the prior art(s) of record does not give all the steps necessary to give a complete invention.

Regarding Claim 15, the prior art(s) of record does not disclose applying the fast current decay process for a second time period equal to the measured first time period, reducing the first motor phase current using a slow current decay process, the prior art(s) of record does not give all the steps necessary to give a complete invention.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
